

Certified **CMIS** Service

Integration in SAP S/4HANA Public Cloud

**easy**

# heading into the future with easy & CMIS: perfect for SAP S/4HANA Public Cloud

## The right data in the right hands

Content Management Interoperability Services (CMIS) supply a forward-looking solution to the products from easy for implementing **SAP S/4HANA Public Cloud**.

As a **standard interface**, CMIS replaces the previously established **ArchiveLink®**. If you have been relying on ArchiveLink in an easy product, such as for archiving, it is now time to get started with CMIS.

For future-proof GoBD- and GDPR-compliant document archiving with the certified **easy archive CMIS Service** interface.

## easy archive CMIS Service certified!

easy archive CMIS Service 1.0 has been **certified by SAP** for seamless integration into SAP S/4HANA Public Cloud.

## Why CMIS?

CMIS is the **only option** for **audit-proof archiving** in S/4HANA Public Cloud. CMIS offers comparable functionality to ArchiveLink while also providing **greater flexibility** for the integration of document storage solutions.

One of the main goals of CMIS is to make the content repositories utilized by various applications in the company accessible and usable both internally and externally. With products from easy, this means **lower costs** since you no longer have to use and pay for the in-memory database of S/4HANA. Ideal for SAP S/4HANA Public Cloud, perfect for easy applications.

With easy archive and CMIS, we give you back the freedom for seamless interaction between leading SAP systems and archiving. At the same time, CMIS offers more flexibility when accessing documents from your SAP-side business processes, whether in the **cloud, on-premises or in hybrid deployment** models. For example, you could store invoices in the cloud and contracts only on-premises. All of this can be **conveniently configured per SAP client**.

## More than archiving: optimized business processes with easy archive

## Advantages

- **Lower costs, higher performance** – external archiving minimizes the data volume in the S/4HANA system, which improves performance
- **Simple access** – all archived data will still be available and easy to find after archiving.
- **Simple integration** – the preconfigured, streamlined solution can be implemented and linked to the SAP system during live operation.
- **Certified by SAP** for optimal integration into the SAP system and high investment security.
- **Audit security and data protection** – the archiving complies with the statutory requirements such as GoBD and GDPR.
- **Access to expanded services/products** from easy with added value for the SAP documents: such as in self-service portals or easy AI for data extraction.

easy archive CMIS Service is without doubt a major milestone offering a new level of flexibility with easy applications in the SAP S/4HANA cloud. With easy, you will be able to significantly simplify your processes and transform your archiving system into an information hub. Profit from faster and more efficient workflows utilizing your archived data.
